

RESEARCH GAME

The European scientific research game for schools

Research Game is an innovative Comenius European Union funded project that motivate secondary school students by replicating the excitement of scientific research and exposing them to the process of a scientific methodology.

The Project creates an Internet-based educational game to develop an understanding of research work and to teach best practices. The students collaborate internationally across Europe, to build hypotheses, research and test the validity of their hypothesis and finalize a theory based on their findings.

Stage 01

Specification and development of the Research Game

Stage 02

Competition in which teams of schools across Europe carry out ecological research and report their process and findings on the project community platform

Stage 03

Preparation of documents that will permit replication of the game and an understanding of the outcomes

Research Game is a hugely successful at using student's personal interest in science as a motivator for learning.

Schools across Europe are invited to take part in the Research Game project.

Please, visit the website and enjoy using the project's open resources or write to us for more information.

Motivating Secondary School Students To Learn Research Methodologies.

Why you need science and the scientific method in your life?

- * Do you take pills?
- * Do you use a mobile?
- * Do use the Internet?

All these normal, everyday things are based on the scientific method and research, the basis of science. Even simple everyday things use science in their development and manufacture. Today and in to the future your education and careers use the scientific method and its analytical structure.

Lifelong
Learning
Programme
